carbon dioxide this seemingly simple and ubiquitous substance is fundamental to how our planet works all life is made from co2 and its behavior on this planet has kept it bizarrely habitable for hundreds of millions of years in its workings lie both

the splendor of our world and the potential for life's destruction in short it is the most important substance in earth's history but why is CO_2 as essential to life on earth as it is capable of destroying it in the story of CO_2 is the story of everything award winning science journalist peter brannen reveals carbon dioxide's fundamental role in the operation and maintenance of planet earth starting at the beginning of time and working all the way up to our present reality he illuminates how CO_2 has been responsible for the planet's many deaths and rebirths for the evolution of life and for the development of modern human society carbon dioxide's movement through the rocks the air the oceans and life has kept our planet's climate livable its air breathable and its oceans hospitable to complex life for more than 500 million years and only by understanding CO_2 in the context of deep earth history can we see how it gave rise to today's industrial economy and more clearly recognize what it means to be churning through hundreds of millions of years of old life in the form of fossil fuels and converting it all to carbon dioxide with groundbreaking research and a clear eyed perspective brannen shows how a deep exploration into the mechanics of the carbon cycle and the history of our planet can provide hope for averting environmental catastrophe in the future it all starts with a richer understanding of the essential role of one substance
